

Pisini Pradeep

Java Backend Developer

pradeep.pisini.india@gmail.com | +91 7287909358 | [linkedin.com/in/pisinipradeep](https://www.linkedin.com/in/pisinipradeep) | github.com/pradeeppisini
| Chennai, Tamil Nadu, IN

PROFESSIONAL SUMMARY

Java Backend Developer with 3 years of experience building microservices for banking and payment systems across settlement, billing, and dispute processing. Engineered event-driven pipelines using Apache Kafka and Apache Flink, process high-volume card payment transactions daily, and migrated legacy COBOL modules into Java microservices to modernize core transaction processing. Skilled in Spring Boot and microservices architecture across the full development lifecycle.

TECHNICAL SKILLS

Languages	Java, SQL, PowerShell
Backend	Spring Boot, RESTful APIs, Microservices, Swagger/Open API, JPA, Hibernate, Streaming & Messaging, Apache Kafka, Apache Flink
Databases	MySQL, MongoDB, SQL Server
DevOps / Tools	Git, GitHub, Jenkins, Jira, VS Code, Docker, OpenShift
Testing	JUnit, Mockito, Agile, CI/CD, Production Support

PROFESSIONAL EXPERIENCE

Software Engineer — Mphasis

Full-time | Nov 2023 – Present

Client: Fiserv — Enterprise Database Deployment Automation Framework (2026)

Tech Stack: PowerShell, SQL Server, HTML Reporting, CSV Reporting

- Engineered an enterprise database deployment automation framework for SQL Server release management.
- Implemented state management, checkpoint tracking, and resumable execution to support failure recovery and restartable deployments.
- Built automated preflight validation to verify SQL script readiness before each deployment execution.
- Developed audit logging, execution tracking, and HTML/CSV reporting for deployment traceability and operational visibility.
- Automated end-to-end release workflows with dry-run support and versioned script ordering to reduce manual effort.

Client: Fiserv — Banking & Payment Processing

Tech Stack: Java | Spring Boot | Microservices | REST APIs | JPA/Hibernate | Apache Kafka | Apache Flink | MongoDB | Docker | OpenShift | Jenkins | SQL | COBOL Modernization

- Engineered 3 RESTful microservices (settlement, billing, dispute processing) using Java, Spring Boot, JPA, and Hibernate, supporting core banking workflows in production.
- Built event-driven processing pipelines using Apache Kafka and Apache Flink, processing thousands of card payment transactions daily with MongoDB for low-latency persistence.
- Containerized microservices with Docker, deployed on OpenShift, and maintained Jenkins CI/CD pipelines to improve deployment consistency and release reliability.
- Migrated multiple legacy COBOL modules into Java microservices, reducing technical debt and improving long-term maintainability of transaction processing logic.

Client: Fiserv — Quadient Inspire — Customer Communication Management.

Tech Stack: Quadient Inspire Designer | Customer Communication Management

- Configured customer communication templates and composition workflows for personalized bank statements and correspondence delivery.
- Implemented data ingestion, transformation, and grouping logic to generate structured, proof-ready document outputs for business review.

PROJECTS

Speech-to-Text Application

Tech Stack: Java 17, Spring Boot, Browser Web Speech API | 2026

- Developed a speech-to-text web application with real-time voice capture using the Browser Web Speech API.
- Built RESTful backend APIs in Spring Boot to process transcribed speech and persist timestamped records.
- Integrated Apache POI to generate and maintain Excel-based speech logs for structured reporting.
- Implemented reporting features to retrieve and display historical transcription data through a web interface.

LANGUAGES

English (Professional) | Telugu (Native)

EDUCATION

B.Tech in Electronics & Communication Engineering

KL University | 2022 | CGPA: 8.45 / 10

AWARDS

Kudos Award (3 Times)

- Recognized for delivering internal engineering applications within tight timelines through effective cross-team collaboration.
- Appreciated for proactive contribution to technical innovation and continuous skill development.

Synergic Workforce Award.

- Awarded for ownership, delivery consistency, and adaptability across project requirements in enterprise development environments.

CERTIFICATIONS

- Certified Java Full Stack Developer – Mphasis (Simplilearn)
- Master AI Spec-Driven Development with BMAD Method
- Huawei Certified ICT Associate – Artificial Intelligence
- Huawei Certified ICT Associate – Routing
